

DHRUV PARMAR

Full stack web developer

+91 9004192909 | Borivali, Mumbai | dhruvparmardp29@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Objective

Full Stack Engineer specializing in developing scalable web & AI applications with expertise in React, Node.js, and MongoDB. Demonstrated success in leading frontend projects and enhancing user interfaces. building agentic AI systems using LangChain, LangGraph, and RAG pipelines, with hands-on experience shipping LLM-powered products to real users.

Skills

Languages: Python, C++

Backend: Node.js, Express.js, RESTful APIs

Version Control & Deployment: Git, GitHub, Vercel

Authentication & DB: Clerk, JWT, MongoDB

Frontend: JavaScript, TypeScript, React.js, R3F, Next.js, Tailwind CSS, GSAP

AI & Agentic: LangChain, LangGraph, RAG, Vector Embeddings, Guardrails, LLM Evals, Gemini, Deepseek

Experience

1) Healdoc.ai | Frontend Developer

Aug 2024 - Feb 2025

- Led the transformation of an outdated static site into high-performance, modern web platform using React.js
- Managed complete redesign of Healdoc.ai to a React application, significantly improving maintainability and scalability.

2) Sensys Technology | UI/UX Designer & Developer

July 2024 - Oct 2025

- Enhanced interface clarity and workflow efficiency by revamping key modules of the HRM Thread platform at Sensys Technology.
- Enhanced UI with HTML, CSS, jQuery, and Tailwind CSS.

3)Engaze | UI/UX Designer

Dec 2023 - Jan 2024

- Focused on user-centric interaction patterns, designed an accessible chat interface in Figma during the tenure at Engaze.

Personal Projects

VibeContent: [Live link](#)

- Built an AI SaaS that scrapes a creator's last 30+ Instagram posts, extracts voice/tone/niche signals, and generates personalized reel scripts across 17 languages. shipped to real users, 0 to production solo.
- Designed multi-step LLM pipeline using Gemini for profile analysis, niche detection, and voice-matched content generation reducing creator scripting time from ~2hrs to under 30 seconds.
- Built with Next.js App Router, MongoDB, JWT auth, and role-based dashboard; handled full stack independently from prompt engineering to deployment.

Support AI: [Live link](#)

- Automated support ticket assignment using AI skill-matching.
- Integrated Gemini for instant, AI-generated troubleshooting steps.
- Role-based workflow: admin (full control), sales (create/view), skilled person (resolve, manage skills).

Social Media App: [Live link](#)

- Building a feature-rich social media app using Next.js App Router, Clerk authentication, and NeonDB.
- Includes real-time post feeds, likes, comments, and protected user routes.
